To whom it may concern

### Letter of Recommendation for Christian Dohrmann

With this letter I offer my recommendation for Christian Dohrmann, who I have known and worked with as his colleague and supervisor during his time at the UNESCO Bangkok office for three years.

Mr. Dohrmann has demonstrated his solid competencies in supporting the management and implementation of programme activities through efficient project coordination with our national and international, internal and external stakeholders and partners, also providing project oversight and planning assistance.

He has shown to have a broad repertoire of skills that allow him to approach tasks from an analytical as well as creative perspective, all the while being pragmatic about reaching set goals. He is capable of crafting complex technical programme documents through conducting thorough research as well as thinking across disciplines. He also produced multimedia products, which further speak for his multiple talents.

While Mr. Dohrmann worked at the UNESCO Bangkok office on a number of consultancy assignments, he also engaged in the office's working groups from the media and communication, natural sciences, and education units, which showcases his curiosity for the work of and appreciation among the teams of the different disciplines.

Mr. Dohrmann is a resourceful professional capable of the management of projects and with his determination is likely to achieve whatever he aspires. It is my conviction that his capacities in a range of disciplines will make him a valuable individual for your organization.

Sincerely,
